

TANVIR BHACHU

Full-Stack Web Developer with 7 years of experience, passionate about building scalable web apps with React, Next.js, and TypeScript. I created Jadebook, a SaaS platform packed with features like encryption and AI integrations, and sharpened my front-end skills at Triton Digital working on Omny Studio. I love exploring cutting-edge tools like TanStack and Supabase, and I'm always excited to tackle challenges, solve problems, and create innovative solutions in a meaningful role.

Tech Stack

NextJS, React, TailwindCSS, Typescript, PostgreSQL, TanStack, Git, NodeJS, Redis, Zod, Vercel, SanityCMS, Zod, Zustand and more

Education

Murdoch University (2021 - 2022)
Bachelor of Information Technology

Awards

Young ICT Explorers (2020)
Came second in a national competition. Build a web app that shows the potential trajectory of a hurricane in real-time using machine learning.

Work Experience

Omny Studio (Oct 2022 - Sept 2024)
Frontend Developer
Helped built a production-level content platform using React, React Router, Typescript and TailwindCSS.

Triton Digital (May 2024 - Sept 2024)
Frontend Developer
Helped on an extremely type-safe, bug free React application. Used React, TypeScript, GraphQL and Styled components.

Referral: [Sharon Taylor \(VP at Triton Digital\)](#)

Notable Projects

Jadebook (2025)
Solo Project
A SaaS application with encryption, rate limiting, auth, file management, AI integrations, Stripe and more.
